

# Unitech's EA500 Brings You Next Level Data Collection

## The Slim & Portable EA500 Mobile Worker

Cypress, California - August 6, 2018 - Data collection technology changes at a fast pace and the Unitech EA500 is designed stay on trend and within budget.

Its light form factor and slim design ensures a comfortable hold and easy all-day scanning while a 5-inch ultra sensitive capacitive touch screen works with or without gloves.

This handy worker offers a range of connectivity points and fast device running with its 1.4 GHz Quad-Core processor and Android 7.1, dual band antenna, and 3G or 4G option connections. Utilize near field communication (NFC) or WiFi for even faster connection and data transferring and collecting.

Everything you need to get started is in the box with an included USB cradle and power supply. The ergonomically shaped device features an ultra clear HD display and dual scanning buttons to accommodate left- and right-hand users. The EA500 offers two ways to charge; first, through a pogo pin cradle which reduces wear on the device and second, through a type C charging cable which gives you faster and more reliable charging than micro USB cables.

“The EA500 is our slimmest mobile device” said Brian Silence, Director of Business Development, “it has a large touch screen display so it gives you plenty of room to work. It’s also great in different environments, you can use it while wearing gloves in cold climates or for warehouse jobs.”

The EA500 is fully loaded and ready to use in your retail, transportation, and warehousing applications.

## Pricing & Availability

The EA500 is available now and priced at \$ 800.00 MSRP. Please contact your sales manager for full details.
