

Unitech Rugged Smartphones

Improve Communication with Network Ready Phones

Unitech devices are compatible with many popular U.S. service providers to ensure clear communication and less dropped calls.

Our mobile computers and tablets are **ruggedized for drop protection** and guard against dirt, moisture, and dust. In addition to **smartphone features** like large screens and lightweight form factors, they provide exceptional call service and web browsing.

High definition Gorilla Glass displays allow for easy reading but are durable enough to withstand bumps, scratches, and falls. Businesses can use the **integrated barcode scanner** to detect 1D and 2D barcodes quickly and easily.

Network and connect like never before with Unitech devices on your network.
